Hungarian CoRoT Day
March 12, 2007, Budapest

9:30–10:00 **Dr Margit Páparó**

HAG - two years of the Hungarian COROT project

10:00-10:45 **Dr Ennio Poretti**

COROT mission: scientific profile and preparatory ground-based observations

10:45-11:15 Coffee break

11:15-12:00 **Dr Philippe Mathias**

Gamma Doradus stars from an observational point of view

12:00-12:30 **Dr Zoltán Kolláth**

Sounds of strange modes

12:30–13:30 Lunch break

13:00-13:30 **Dr László Szabados**

Subtle changes in Cepheid light curves

14:00-14:30 **Dr József Benkő**

CoRoT fields before CoRoT

14:30-15:00 **Zoltán Csubry**

CoRoT fields before CoRoT - Processing of large photometric databases

15:00-15:30 Coffee break

15:30-15:45 **Zsófia Bognár**

HD 44283: Delta Scuti star with regular frequency distribution

15:45-16:00 **László Molnár**

HD 44195: a hybrid star with Delta Scuti and Gamma Doradus character

16:00-16:15 **Emese Plachy**

HD 181555: main target of the first long run of COROT

16:15-16:30 **Gyöngyi Kerekes**

P-type pulsators on the main sequence of HR Diagram

16:30-16:45 **Péter Pápics**

Frequency content of HD 50844
